Preface

National Statistics and Information Authority takes pleasure in publishing the Foreign Trade Statistics for 2024-25. This bulletin presents foreign trade data disaggregated by commodity and country. In this bulletin, commercial imports are reflected. However, imports paid by loan and aid funds are not included in the total foreign trade data. In addition to the export and import of goods, services also constitute a major part of the economic activities of countries. Therefore, in this publication, we aim to publish the export and import of services, along with their balance to other foreign countries, categorized by boundaries and quantity. It also includes the value and quantity of re-exports by commodity and country to enhance the effectiveness of this publication. All readers are kindly urged to share their useful comments and suggestions, as it will greatly contribute to improving the next trade statistics bulletin.
